Printing Instructions Using SD Card

1
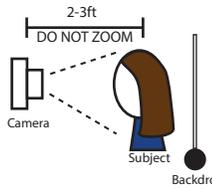

With subject standing in front of white backdrop, align head and shoulders with the guide sticker on the camera LCD. (DO NOT ZOOM)

2
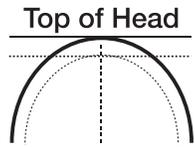

Line up head and shoulders with solid line for USA passport photos and with dashed line for Canadian passport photos.

3

Ensure paper is in paper tray and ink ribbon cartridge is in printer.

4

After taking photo, remove SD card from camera.

5

Insert SD card in slot on the front of printer, label side up.

6

Press power button to turn on the printer.

7

Printer will default to 'ID Photo Settings'. USA systems will be set to 2x2 inch, Canadian systems will be set to 70mmx50mm. If photo size is correct, press 'OK'.

8
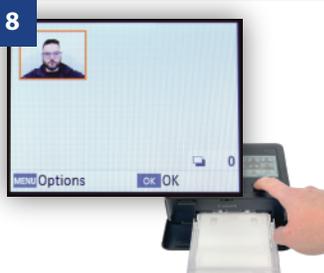

Select desired photo to print, press 'OK'.

9

Make sure crop marks are centered on the person, press 'OK'.

10
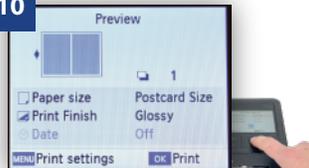

Press 'OK' on the 'Print Preview' Screen.

11

Disregard error message, press 'OK'.

12

The print process will complete after 4 passes through the printer.

Printing Instructions Using USB (Requires USB-C to USB adapter: sold separately)

1

To plug camera into printer, insert a USB-C to USB adapter into printer. (sold seperately)

2

Plug camera USB cable into adapter and into camera.

3
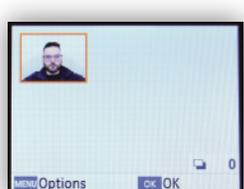

Printer will see camera as an SD card, continue from step #8 above.
